

Dear families,

Our class has been working for the past year on a unit that focuses on becoming responsible global citizens, critical thinkers, and future leaders. Through state and national social studies standards, our students have been working with the non-profit organization Education For All Children (EFAC) to create connections and learn about the lives of exceptionally bright but under-privileged students in Kenya, Africa.

The students have decided to hold a school-wide coin drive to raise the \$750 tuition needed to send our scholarship student to secondary school for a year. Each classroom will be collecting donations from _____. The homeroom classroom with the highest amount of funds raised at the end of the coin drive will win a class ice cream party.

Thank you so much for your help with sponsoring EFAC and fostering our students' global awareness of education around the world! If every student donated one dollar, we would have enough to send one student to school and make a difference!
